#### General

Optional unit division is NOT available by section or section equivalent. Optional unit division is available based on Farm Serial Number (FSN) and any other method specified in the Basic Provisions or Crop Provisions except section or section equivalent. To be eligible for the available methods of optional unit division, you must meet all applicable requirements.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

#### Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

## Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Wheat (0011)	Use Year: 2026
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Jones (067)

### Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

### Quality

#### GENERAL STATEMENTS:

For the purpose of this section, the term "quality" means the quality of the crop as determined by the quality adjustment factors.

For the purpose of this section, the term "quality adjustment factors" means the factors that are used to determine the quality of the crop. The factors are listed in the following table:

Factor	Description
1	Quality adjustment factors are considered in determining production to count.

For the purpose of this section, the term "net production to count" means the production of the crop after the quality adjustment factors have been applied. The net production to count is determined by the following formula:

$$\text{Net Production to Count} = \text{Production to Count} - \text{Quality Adjustment Factors}$$

For the purpose of this section, the term "qualifying for quality adjustment" means the crop must meet the following criteria:

- The crop must be produced under the AIP.
- The crop must be produced in accordance with the quality adjustment factors.

For the purpose of this section, the term "extension of time to harvest" means the period of time that the crop is allowed to remain in the field after the calendar date for the end of the insurance period. The extension of time to harvest is determined by the following criteria:

- The crop must be produced under the AIP.
- The crop must be produced in accordance with the extension of time to harvest factors.

For the purpose of this section, the term "production qualifying under section B or C" means the production of the crop that is sold to other than a disinterested third party, or that is not sold 60 days after the calendar date for the end of the insurance period.

For the purpose of this section, the term "production qualifying under Sections B or C" means the production of the crop that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

For the purpose of this section, the term "production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health" means the production of the crop that contains substances or conditions that are injurious to human or animal health. The production of the crop is determined by the following criteria:

- The crop must be produced under the AIP.
- The crop must be produced in accordance with the quality adjustment factors.

- Á

Á

The statement does not supersede the provisions contained in section 14 (e) in the Basic Provisions.

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B, and C must be obtained in accordance with the Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period

## Special Provisions 2026 and Succeeding Crop Years

County: Jones (067)

[illegible]

If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the EOIP, otherwise such production will not be eligible for payment.

[illegible]

On the date of final inspection for the unit, any production which due to insurable causes is determined to have zero market value\*\*\*, such production will not be  
market value, except for production fed or used in any other manner.

a. Moisture content;
