General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Canola (0015)	Upland Soybean (0010)
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Dewey (043)

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

For insured crop acreage planted during the late planting period, the production guarantee for each acre will be reduced for each day planted after the final planting date by: 3% for the 1st through the 5th day.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Insurance will not attach to any acreage on which canola, camelina, crambe, chickpeas, dry beans, mustard, rapeseed, or sunflowers were planted in the previous crop year. A crop which was planted and then all plant growth is terminated by chemical or mechanical means prior to the acreage reporting date, will not be considered planted for rotational purposes ONLY. The insured is responsible to provide proof of insurability.

Any fall planted acreage on which seed is spread onto the soil surface by any method (e.g. airplane or otherwise broadcast seeded) and is subsequently mechanically incorporated into the soil, will be insurable only if you request an inspection for this acreage within 72 hours after the final planting date or within 72 hours after you complete incorporating the seed if you plant in the late planting period, and we agree in writing that the acreage has an adequate stand to produce the yield used to determine your production guarantee. No coverage will be provided if an adequate stand is not established within 30 days after the end of the late planting period or within 30 days after the final planting date if no late planting period is applicable. Insurance will attach to acreage with an adequate stand on the date the acreage is inspected.

Cultivars of Brassica carinata are eligible for insurance under the Canola and Rapeseed Crop Provisions and are not insurable under the Mustard Crop Provisions; however, Brassica carinata is only insurable by written agreement.

6. ZERO MARKET VALUE

7. REDUCTION IN VALUE (RIV):

- a. Moisture content;
- b. Damage due to uninsured causes;
- c. Drying;
- d. Handling;
- e. Processing; or
- f. Any other costs associated with normal harvesting, handling, and marketing of your production.
 - i. If a lower RIV is available for production sold at a distant market, the RIV at the distant market may be increased by the fair consideration to deliver the production to the distant market, provided the resulting RIV does not exceed the RIV in your local marketing area.
 - ii. If the RIV can be decreased by conditioning the production, the RIV may be increased by the cost of conditioning provided the resulting RIV does not exceed the RIV before conditioning.
 - iii. The RIV and local market price* are determined on the date such quality adjusted production is sold to a disinterested third party.

DFs for Aflatoxin:

Aflatoxin Range	DF
0.0-300.1 ppb	See Quality Adjustment Tab for Discount Factors
300.1 ppb & above	See C3 below

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Canola (0015)	Unit: MU\ æ { æQ €D
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Dewey (043)

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any other substances or conditions qualifying under Section C having a level exceeding the maximum amount allowed, or when the edible portion of a crop is exposed to flood waters, a claim will not be adjusted for quality deficiencies. If the claimant elects to adjust for quality deficiencies, the claimant must elect to adjust for all quality deficiencies. On the date of final adjustment for the unit, the following will apply (if such production is Zero Market Value, see Section D):
- The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
 - The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
- b. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
- The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
 - The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
- c. If production qualifying under Section C3 remains unsold, or is not destroyed more than 365 days after the calendar date for the end of insurance period, the claimant will not be adjusted for any quality deficiencies listed in Section C.
- d. If production qualifying under Section C3 remains unsold, or is not destroyed more than 365 days after the calendar date for the end of insurance period, the claimant will not be adjusted for any quality deficiencies listed in Section C.

ZERO MARKET VALUE PRODUCTION

For production listed in sections A, B, or C that we determine has zero market value due to insured quality deficiencies:

- For production in Section A, the pre-established DFs.
- For production in Section B, the pre-established DFs.

Special Provisions

2026 and Succeeding Crop Years

Year: 2026	Commodity: Canola (0015)	Upland Soybean
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Dewey (043)

c. For production in Section C1 or C2, such production will not be adjusted for any quality deficiencies listed in Section C.

3. ~~Grain~~ ~~that is~~ ~~not~~ ~~adjusted~~ ~~for~~ ~~any~~ ~~quality~~ ~~deficiencies~~ ~~listed~~ ~~in~~ ~~Section~~ ~~C.~~

*	Local Market Price is defined in the applicable Basic, Crop, or these Provisions.
**	Disinterested third party is a person or business who does not routinely purchase production for resale or for feed will not be considered a disinterested third party if the RIVs applied by the buyer are not reflective of the RIVs in the local market.
***	Zero market value occurs when no buyers in your local area are willing to purchase the production and fair consideration to deliver production to a market outside your local marketing area (distant market) is equal to or greater than the production's value at the distant market or when acreage of an insured crop in which the edible portion of the crop has been exposed to flood waters.
****	Sold Grain is considered sold on the date that final settlement between the buyer and seller has occurred and title of the grain has passed from the seller to the buyer
*****	Unsold Grain that does not meet the definition of sold .
