General

Varieties must be a variety of fresh market snap bean adapted to the county.

For insurability, producers may continuous crop Fresh Market Beans for no more than two bean crops in a crop year (i.e., fall and winter, winter and spring, or fall and spring). After two bean crops the land must be rotated with a non-leguminous crop or allowed to lay fallow.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Price

In accordance with the definition of price for unharvested production in section 1 of the Fresh Market Bean Crop Provisions, the factor to compute the price for unharvested acres is listed in the prices tab of the actuarial documents.

Premium

Any acreage in this county with a high risk area designation on the actuarial map will have a rate adjusted in accordance with the high risk area and map area rates table.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.
