General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

In lieu of section 7 of the Small Grains Crop Provisions, the end of insurance period for winter-type acreage will be August 31 immediately following planting.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Quality

GENERAL STATEMENTS:

Yield shall be determined by the following formula:

Yield = (Gross Production - Allowable Reductions) x Quality Adjustment Factor (QAF)

adjustment factors are considered in determining production to count.

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

Yield shall be determined by the following formula:

Yield = (Gross Production - Allowable Reductions) x Quality Adjustment Factor (QAF)

B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

Yield shall be determined by the following formula:

Yield = (Gross Production - Allowable Reductions) x Quality Adjustment Factor (QAF)

automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following formula:

1. OPTION TO DELAY CLAIM SETTLEMENT:

- a. If you elect to settle your claim for the full value of the production, your claim will be settled using the Full Value (FV) option outlined below, your claim will be settled using the applicable DFCs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.
- b. If you sell the production to a disinterested third party during this delay, your claim will be settled using the Reduction In Value (RIV) as outlined below, unless you elect to settle your claim for the full value of the production.
- c. If you elect to settle your claim for the full value of the production, your claim will be settled using the applicable DFCs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.
