General

If greater than twenty five percent (25%) of production is intended to be utilized by the insured (i.e.: feeding their own livestock), a pre-harvest inspection is required. The company must be notified 15 days before harvest begins. A pre-harvest appraisal is required if acceptable production records, as described in the Crop Insurance Handbook, will not be available.

Adequate/Minimum Stand of living plants required for Grass: in lieu of the Forage Crop Provision definition of adequate stand, the following shall apply: at least 60% of ground is covered (determined at cutting height) by live plants immediately prior to insurance attaching on May 1 for new stands or September 1 for existing stands.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Type

*4 Grass: Stands of Timothy grass and/or Brome grass, or a mixture of Timothy or Brome with other grass species such as Canary, Orchard, etc, where Alfalfa or other legumes constitutes less than 25% of the mix.

Date

In accordance with Section 7(a) of the Crop Provisions, insurance attaches on acreage with an adequate stand on October 16th for the calendar year following the year of seeding for Fall planted forage.

Special Provisions

2026 and Succeeding Crop Years

Year: 2026	Commodity: Forage Production (0033)	Use: 1001a - AEG
Date: 6/4/2025	Plan: APH (90)	County: Kenai Peninsula (122)
