Acreage of Kentucky Bluegrass may be insured for as long as the crop meets the requirements for insurability contained in the Crop Provisions.

Acreage of perennial ryegrass may only be insured for one crop year. The stand must be replaced for each crop year. A volunteer crop of perennial ryegrass is not considered planted acreage and is not insurable.

See the Crop Provisions regarding quality adjustment.

Price

Contract price:

You may use a contract price to determine your insurance guarantee when a contract price code of ~~yes~~/~~4~~ exists on the Prices tab in the actuarial documents for the crop, type, and practice.

Contract price authority (i.e., rules governing the use of contract prices and the method to determine a contract price) will be found in one of the following three places, listed in priority order:

1. Special Provisions, separate from this statement, which authorizes the use of the Contract Price Addendum (CPA);
2. Crop Provisions; or
3. CPA.

When the contract price code is ~~yes~~/~~4~~ on the Prices tab for the crop, type, and practice:

1. If the Crop Provisions or Special Provisions provide the contract price authority, your price will be determined in accordance with the Crop Provisions or Special Provisions. If neither the Crop Provisions or Special Provisions provide contract price authority, your price will be determined in accordance with the CPA; and
2. The Crop Provisions or Special Provisions may only provide contract price authority for specific types or practices. When this occurs, the CPA may be used to determine a contract price for other types or practices where contract price authority is not provided through the Crop Provisions or these Special Provisions.

The Base (contracted) Price will not include added value attributable to hauling expenses beyond the local marketing area or post production operations such as processing (cleaning/drying), sorting, packaging, etc.
