General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

Date

*4 In lieu of section 6 (a)(2) of the Basic Provisions, you must submit your acreage report on or before the acreage reporting date contained in these Special Provisions.

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Special Provisions 2026 and Succeeding Crop Years

Ùæ^kMÔæ[!}æÉD

County: Fresno (019)

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Insured Crop: In addition to section 6 of the Small Grains Crop Provisions, the person must submit acceptable records of acreage and harvested grain production for the non-irrigated practice by the production reporting date. On a county basis, these records must show that the person planted and harvested eighty percent of their acreage for grain in at least one year of the last five consecutive crop years. Using another producer's records does not meet this requirement. The person must provide supporting evidence/verifiable records of the grain production in accordance with the Crop Insurance Handbook procedures.
