General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Quality

GENERAL STATEMENTS:

For all quality adjustment factors, the following shall apply:

For all quality adjustment factors, the following shall apply: (1) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For all quality adjustment factors, the following shall apply: (2) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For all quality adjustment factors, the following shall apply: (3) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For all quality adjustment factors, the following shall apply: (4) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For all quality adjustment factors, the following shall apply: (5) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For all quality adjustment factors, the following shall apply: (6) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For all quality adjustment factors, the following shall apply: (7) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

- For all quality adjustment factors, the following shall apply: (8) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.
- Sections C1 or C2 and Section B below, the DF will be determined by adding the applicable DFs from Section B to the applicable DFs from Sections C1 or C2.
- For all quality adjustment factors, the following shall apply: (9) the quality adjustment factor shall be determined by the difference between the actual quality and the quality of the sample of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

2. If you do not destroy (or refuse to destroy) production in a manner acceptable to us, such production to count is no longer considered to be zero market value and will be adjusted as follows:
 - a. $\ddot{Q} | \ddot{A} | [\ddot{a} \sim \& \ddot{q}] \ddot{A} \ddot{A} \wedge \& \ddot{q}] \ddot{O} \ddot{A} \ddot{A}$ the pre-established DFs.

 - c. For production in Section C1 or C2, such production will not be adjusted for any quality deficiencies listed in Section C.
