Any acreage in this county with a high risk area designation on the actuarial map will have a rate adjusted in accordance with the high risk area and map area rates table.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Any acreage designated as unrated on the actuarial map will be insurable only by written agreement. Contact your crop insurance agent by the sales closing date to determine eligibility requirements.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

- *10 Insured Crop: In addition to section 6 of the Small Grains Crop Provisions, the person must submit acceptable records of acreage and harvested grain production for the non-irrigated practice by the production reporting date. On a county basis, these records must show that the person planted and harvested eighty percent of their acreage for grain in at least one year of the last five consecutive crop years. Using another producer's records does not meet this requirement. The person must provide supporting evidence/verifiable records of the grain production in accordance with the Crop Insurance Handbook procedures.
