General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

In accordance with the definition of "production reporting date" in the Basic Provisions, if you submit an application for insurance after the winter sales closing date or land is added after the production reporting date on which the spring type will be planted, the production reporting date will be the earlier of the acreage reporting date or 45 days after the spring sales closing date.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

DFs for Aflatoxin:

Aflatoxin Range	DF
0.1 to 300.1 ppb	See Quality Adjustment Tab for Discount Factors
300.1 ppb & above	See C3 below

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any other substances or conditions qualifying under Section C having a level exceeding the maximum amount allowed or when the edible portion of a crop is exposed to flood waters, a claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
 - a. If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
 - i. If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
 - ii. If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
 - b. If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
 - i. If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
 - ii. If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
 - c. If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
 - d. If production qualifying under Section C3 remains unsold, or is not destroyed, more than 365 days after the calendar date for the end of the insurance period, such production will not be adjusted for any quality deficiencies listed in Section C.

SECTION D - ZERO MARKET VALUE PRODUCTION

If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.

1. If the level of Aflatoxin is greater than 300 ppb, the level of Vomitoxin is greater than 10 ppm, or the level of any other substance or condition is greater than the maximum amount allowed, the claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
