#### General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

#### Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

#### Premium

In accordance with section 6 of the Small Grains Crop Provisions, a reduced premium rate is provided for acreage intentionally destroyed before harvest by grazing or other means. To qualify for the reduced premium rate you must notify your agent no later than March 15.

### Insurance Availability

Any fall planted acreage on which seed is spread onto the soil surface by any method (e.g. airplane or otherwise broadcast seeded) and is subsequently mechanically incorporated into the soil, will be insurable only if you request an inspection for this acreage within 72 hours after the final planting date or within 72 hours after you complete incorporating the seed if you plant in the late planting period, and we agree in writing that the acreage has an adequate stand to produce the yield used to determine your production guarantee. No coverage will be provided if an adequate stand is not established within 30 days after the end of the late planting period or within 30 days after the final planting date if no late planting period is applicable. Insurance will attach to acreage with an adequate stand on the date the acreage is inspected.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

In lieu of the provisions in section 22(a) of the Basic Provisions that says "[h]owever, unless specifically required by policy provisions, you must not obtain any other crop insurance authorized under the Act on your share of the insured crop," you may obtain a Small Grains Crop Insurance policy and an Annual Forage policy on the same acreage that is planted with the intent of grazing the crop first and then later harvesting the crop for grain.

If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the EOIP, otherwise such production will not be eligible for payment.

## 5. FAIR CONSIDERATION TO DELIVER TO DISTANT MARKETS

[illegible]

## 6. ZERO MARKET VALUE

## Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Wheat (0011)	Use of RVP: <input checked="" type="checkbox"/> FD
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Gage (067)

On the date of final inspection for the unit, any production which due to insurable causes is determined to have zero market value\*\*\*, such production will not be included in the calculation of the RIV, except for production fed or used in any other manner.

### 7. REDUCTION IN VALUE (RIV):

RIV is calculated as follows:  $RIV = (MC + D + P + H + C) \times (1 - \frac{Y}{Y_{max}})$

- a. Moisture content;
- b. Damage due to uninsured causes;
- c. Drying;
- d. Handling;
- e. Processing; or
- f. Any other costs associated with normal harvesting, handling, and marketing of your production.
  - i. RIVs cannot be used in combination with chart DFs.
  - ii. RIVs may be used to adjust production to the distant market, provided the resulting RIV does not exceed the RIV in your local marketing area.
  - iii. RIVs may be used to adjust production to the distant market, provided the resulting RIV does not exceed the RIV before conditioning.
  - iv. RIVs may be used to adjust production to the distant market, provided the resulting RIV does not exceed the RIV before conditioning.

### SECTION A - DISCOUNT FACTOR CHARTS

Use the following chart to determine the discount factor for your production. The chart is based on the following assumptions: 1. The discount factor is based on the number of days from the date of harvest to the date of sale. 2. The discount factor is based on the number of days from the date of harvest to the date of sale.

The discount factor is calculated as follows:  $DF = 1 - \frac{D}{360}$  where D is the number of days from the date of harvest to the date of sale.

### GRADE DISCOUNT:

Grade discount is calculated as follows:  $GD = (1 - \frac{G}{100}) \times P$  where G is the grade discount percentage and P is the price per bushel.
