Special Provisions

2026 and Succeeding Crop Years

Year: 2026	Commodity: Onions (0013)	Use Name: ^* [] A FD
Date: 6/4/2025	Plan: APH (90)	County: Umatilla (059)

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

Type

- *4 Includes insured Fall-planted acreage subsequently reseeded to a NON-STORAGE white or yellow type after the final planting date.

Date

- *5 In accordance with section 3(d) of the Basic Provisions, you may change your coverage level or price election for the following crop year by giving written notice to us not later than the sales closing date. In counties with separate sales closing dates by planting period (fall v. spring), you may only change your coverage level or price election until the spring sales closing date if you do not have any insured fall planted acreage of the insured crop. If you have any insured fall planted acreage of the insured crop, you may not change your coverage level or price election after the fall sales closing date.

Price

Contract price:

You may use a contract price to determine your insurance guarantee when a contract price code of ~~yes~~ exists on the Prices tab in the actuarial documents for the crop, type, and practice.

Contract price authority (i.e., rules governing the use of contract prices and the method to determine a contract price) will be found in one of the following three places, listed in priority order:

1. Special Provisions, separate from this statement, which authorizes the use of the Contract Price Addendum (CPA);
2. Crop Provisions; or
3. CPA.

When the contract price code is ~~yes~~ on the Prices tab for the crop, type, and practice:

1. If the Crop Provisions or Special Provisions provide the contract price authority, your price will be determined in accordance with the Crop Provisions or Special Provisions. If neither the Crop Provisions or Special Provisions provide contract price authority, your price will be determined in accordance with the CPA; and
2. The Crop Provisions or Special Provisions may only provide contract price authority for specific types or practices. When this occurs, the CPA may be used to determine a contract price for other types or practices where contract price authority is not provided through the Crop Provisions or these Special Provisions.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Cipolline, pearl, or any variety of small diameter specialty onions are not insurable unless by written agreement.

Onions planted for processing intended use are not insurable unless specifically covered by written agreement.

Quality

The applicable standards for onions in the following states will apply for this crop year: Oregon and Washington. Fall Planted Non-Storage Whites/Yellows and Spring Planted Non-Storage Whites/Yellows - U.S. Commercial Grade, under United States Standards of Onions (other than Bermuda-Granex-Grano and Creole Types). Spring Planted Reds, Spring Planted Whites, and Spring Planted Yellows - U.S. No. 1 Grade, under United States Standards of Onions (other than Bermuda-Granex-Grano and Creole Types).

The percent of damage referenced in section 14(d) of the Onion Crop Provisions will be 50 percent.
