### General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

In accordance with the definition of "production reporting date" in the Basic Provisions, if you submit an application for insurance after the winter sales closing date or land is added after the production reporting date on which the spring type will be planted, the production reporting date will be the earlier of the acreage reporting date or 45 days after the spring sales closing date.

### Date

In lieu of section 5 (Cancellation and Termination Dates) of the Small Grains Crop Provisions, the Cancellation Date will be September 30 and the Termination Date will be November 30.

### Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Any acreage planted to a hay/forage variety (including but not limited to Willow Creek) is not insurable, unless grown for harvest or sale as seed. A written agreement will be required to insure any hay/forage variety grown for harvest or sale as seed.

### Quality

GENERAL STATEMENTS:

## Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Wheat (0011)	Unit: 100 bushels
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Miner (097)

For the purpose of this policy, the following definitions apply:

**Production to Count:** The production of wheat that is sold or otherwise disposed of by the insured within the time period specified in the policy, and for which the insured has provided a written statement of production to the insurer. The production to count shall be determined by the insured's records, and the insurer shall accept the insured's records as the basis for determining production to count, unless the insurer has reasonable cause to doubt the accuracy of the insured's records. In such case, the insurer may require the insured to provide additional documentation, and the production to count shall be determined by the insurer's records, and the insured shall accept the insurer's records as the basis for determining production to count.

**Net Production:** The production of wheat that is sold or otherwise disposed of by the insured within the time period specified in the policy, and for which the insured has provided a written statement of production to the insurer, minus any production that is lost or damaged by fire, theft, or other cause not covered by the policy. The net production shall be determined by the insured's records, and the insurer shall accept the insured's records as the basis for determining net production, unless the insurer has reasonable cause to doubt the accuracy of the insured's records. In such case, the insurer may require the insured to provide additional documentation, and the net production shall be determined by the insurer's records, and the insured shall accept the insurer's records as the basis for determining net production.

**Quality Adjustment:** The adjustment to the net production of wheat that is sold or otherwise disposed of by the insured within the time period specified in the policy, and for which the insured has provided a written statement of production to the insurer, based on the quality of the production. The quality adjustment shall be determined by the insured's records, and the insurer shall accept the insured's records as the basis for determining quality adjustment, unless the insurer has reasonable cause to doubt the accuracy of the insured's records. In such case, the insurer may require the insured to provide additional documentation, and the quality adjustment shall be determined by the insurer's records, and the insured shall accept the insurer's records as the basis for determining quality adjustment.

**Harvest Extension:** The extension of time to harvest as specified in the policy, and for which the insured has provided a written statement of production to the insurer. The harvest extension shall be determined by the insured's records, and the insurer shall accept the insured's records as the basis for determining harvest extension, unless the insurer has reasonable cause to doubt the accuracy of the insured's records. In such case, the insurer may require the insured to provide additional documentation, and the harvest extension shall be determined by the insurer's records, and the insured shall accept the insurer's records as the basis for determining harvest extension.

**Sold:** Any production qualifying under section B or C (except for section C3) that is sold\*\*\*\* to other than a disinterested third party\*\*, or that is not sold 60 days after the calendar date for the end of the insurance period.

**Unsold:** Production qualifying under Sections B or C (except for production qualifying under section C3) that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

**DF:** For production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following:

- For production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health, the DF shall be determined by the insured's records, and the insurer shall accept the insured's records as the basis for determining DF, unless the insurer has reasonable cause to doubt the accuracy of the insured's records. In such case, the insurer may require the insured to provide additional documentation, and the DF shall be determined by the insurer's records, and the insured shall accept the insurer's records as the basis for determining DF.
- Sections C1 or C2 and Section B below, the DF will be determined by adding the applicable DFs from Section B to the applicable DFs from Sections C1 or C2.
- For production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health, the DF shall be determined by the insured's records, and the insurer shall accept the insured's records as the basis for determining DF, unless the insurer has reasonable cause to doubt the accuracy of the insured's records. In such case, the insurer may require the insured to provide additional documentation, and the DF shall be determined by the insurer's records, and the insured shall accept the insurer's records as the basis for determining DF.

A

### 1. OPTION TO DELAY CLAIM SETTLEMENT

- On the date of final inspection for the unit, if any of your unsold\*\*\*\*\* production qualifies for quality adjustment under sections B and/or C1 or C2a ii and C2a iv below, your claim will be settled using the applicable DF's for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days

after the calendar date for the EOIP.

- b. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP, but before the end of the 60-day extension period, will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP, but before the end of the 60-day extension period.
- c. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP, but before the end of the 60-day extension period, will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP, but before the end of the 60-day extension period.
- d. For any production sold\*\*\*\* to other than a disinterested third party\*\*, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.
- e. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP, but before the end of the 60-day extension period, will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP, but before the end of the 60-day extension period.
- f. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP, but before the end of the 60-day extension period, will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP, but before the end of the 60-day extension period.
- g. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP, but before the end of the 60-day extension period, will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP, but before the end of the 60-day extension period.

Á

### 2. SECTION 14(e) OF THE BASIC PROVISIONS

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B, and C must be obtained in accordance with the Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period (EOIP).

### 3. EXTENSION OF TIME TO HARVEST

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B, and C must be obtained in accordance with the Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period (EOIP).

If we determine you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP, but before the end of the 60-day extension period, will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP, but before the end of the 60-day extension period.

If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable
