General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.
Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.
Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at https://www.rma.usda.gov/en/Topics/Cover-Crops.
Insurance will not attach to any acreage on which canola, camelina, mustard, or rapeseed, were planted the preceding crop year.
A crop which was planted and then all plant growth was terminated by chemical or mechanical means prior to: April 15 for the fall planted types; or June 1 for the spring planted types, will not be considered planted for rotational purposes only. The insured is responsible to provide proof of insurability.
Cultivars of Brassica Juncea meeting US Standards for Grain as canola, e.g. Juncea Canola are eligible for insurance under the Canola and Rapeseed Crop Provisions and are not insurable under the Mustard Crop Provisions.
Cultivars of Brassica carinata are eligible for insurance under the Canola and Rapeseed Crop Provisions and are not insurable under the Mustard Crop Provisions; however, Brassica carinata is only insurable by written agreement.

**Special Provisions**  
**2026 and Succeeding Crop Years**

Year: 2026  
Date: 6/17/2025

Commodity: Canola (0015)  
Plan: Yield Protection (01)  
Revenue Protection (02)  
Revenue Prot with Harvest Price Exclusion (03)

Use: ~~Non-QAF~~ QAF D  
County: Minidoka (067)

$\text{Net Production} = \text{Gross Production} - \text{Allowable Reductions} \times \text{QAF}$

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

Production qualifying for quality adjustment, that does not contain substances or conditions that are injurious to human or animal health, shall be adjusted under  $\text{DF} = \text{DF}_{\text{B}} + \text{DF}_{\text{C}}$

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period  $\text{EOIP} = \text{EOIP}_{\text{B}} + \text{EOIP}_{\text{C}}$

For any production qualifying under section B or C (except for section C3) that is sold\*\*\*\* to other than a disinterested third party\*\*, or that is not sold 60 days after the  $\text{EOIP}$ ,  $\text{DF} = \text{DF}_{\text{B}} + \text{DF}_{\text{C}}$

For production qualifying under Sections B or C (except for production qualifying under section C3) that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in  $\text{DF} = \text{DF}_{\text{B}} + \text{DF}_{\text{C}}$

- a.  $\text{DF} = \text{DF}_{\text{B}} + \text{DF}_{\text{C}}$
- b. Sections C1 or C2 and Section B below, the DF will be determined by adding the applicable DFs from Section B to the applicable DFs from Sections C1 or C2.
- c.  $\text{DF} = \text{DF}_{\text{B}} + \text{DF}_{\text{C}}$

**1. OPTION TO DELAY CLAIM SETTLEMENT:**

- a. If you elect to delay settlement of your claim for up to 60 days after the calendar date for the EOIP, your claim will be settled using the applicable DFs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.
- b.  $\text{DF} = \text{DF}_{\text{B}} + \text{DF}_{\text{C}}$
- c. At any time during this delay in settlement, you may request to settle your claim for any unsold production using the applicable DFs.
- d.  $\text{DF} = \text{DF}_{\text{B}} + \text{DF}_{\text{C}}$

using the applicable DFs.

- e. If the production is later sold, we will not recalculate or adjust your claim for indemnity.
- f. If the time to harvest has been extended as stated below, this option will not apply beyond 60 days after the calendar date for the EOIP.
- g. This option will not apply to any production qualifying under section C3.

### QUALITY ADJUSTMENT STATEMENT

Only when it has been determined that the production qualifies for quality adjustment will the provisions in this Quality Adjustment Statement apply, otherwise this SP statement does not supersede the provisions contained in section 14(e) in the Basic Provisions.

### QUALITY ADJUSTMENT STATEMENT

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of insurance period (EOIP).

If we determine you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA { ~ • • • } must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the EOIP, otherwise such production will not be eligible for indemnity. If you are prevented from harvesting by the calendar date for the EOIP, and your production qualifies for quality adjustment under sections B1, C1a or C2a i, you will be allowed 30 days after harvest to market your grain and receive an RIV unless the production qualifies solely under Section A, in which case, only the DF(s) in Section A, will be used to determine your claim for indemnity not later than the earlier of 60 days after harvest, or 60 days after the date we determine the crop could have been harvested and you did not harvest. If you are prevented from harvesting by the calendar date for the EOIP, and your production qualifies for quality adjustment under sections B1, C1a or C2a i, you will be allowed 30 days after harvest to market your grain and receive an RIV unless the production qualifies solely under Section A, in which case, only the DF(s) in Section A, will be used to determine your claim for indemnity not later than the earlier of 60 days after harvest, or 60 days after the date we determine the crop could have been harvested and you did not harvest.

### QUALITY ADJUSTMENT STATEMENT

QA { ~ • • • } must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the EOIP, otherwise such production will not be eligible for indemnity. If you are prevented from harvesting by the calendar date for the EOIP, and your production qualifies for quality adjustment under sections B1, C1a or C2a i, you will be allowed 30 days after harvest to market your grain and receive an RIV unless the production qualifies solely under Section A, in which case, only the DF(s) in Section A, will be used to determine your claim for indemnity not later than the earlier of 60 days after harvest, or 60 days after the date we determine the crop could have been harvested and you did not harvest. If you are prevented from harvesting by the calendar date for the EOIP, and your production qualifies for quality adjustment under sections B1, C1a or C2a i, you will be allowed 30 days after harvest to market your grain and receive an RIV unless the production qualifies solely under Section A, in which case, only the DF(s) in Section A, will be used to determine your claim for indemnity not later than the earlier of 60 days after harvest, or 60 days after the date we determine the crop could have been harvested and you did not harvest.

### QUALITY ADJUSTMENT STATEMENT

QA { ~ • • • } must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the EOIP, otherwise such production will not be eligible for indemnity. If you are prevented from harvesting by the calendar date for the EOIP, and your production qualifies for quality adjustment under sections B1, C1a or C2a i, you will be allowed 30 days after harvest to market your grain and receive an RIV unless the production qualifies solely under Section A, in which case, only the DF(s) in Section A, will be used to determine your claim for indemnity not later than the earlier of 60 days after harvest, or 60 days after the date we determine the crop could have been harvested and you did not harvest.

## Special Provisions 2026 and Succeeding Crop Years

## 6. ZERO MARKET VALUE

7. REDUCTION IN VALUE (RIV):

ÜÖ•Á ˇ•á^Á^æ[ } æ|^Ë• æËæ á&•ç { æ^Ë[ ÄÖÁ ā^Á æ^Á!æ&^ ç^á^Á•á/á^Á^Á K

- a. Moisture content;
- b. Damage due to uninsured causes;
- c. Drying;
- d. Handling;
- e. Processing; or
- f. Any other costs associated with normal harvesting, handling, and marketing of your production.
  - i. If a higher RIV is available for production sold at a distant market, the RIV at the distant market may be increased by the fair consideration to deliver the production to the distant market, provided the resulting RIV does not exceed the RIV in your local marketing area.
  - ii. If a lower RIV is available for production sold at a distant market, the RIV at the distant market may be increased by the fair consideration to deliver the production to the distant market, provided the resulting RIV does not exceed the RIV in your local marketing area.
  - iii. If the RIV can be decreased by conditioning the production, the RIV may be increased by the cost of conditioning provided the resulting RIV does not exceed the RIV before conditioning.
  - iv. The RIV and local market price\* are determined on the date such quality adjusted production is sold to a disinterested third party.

Á

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any other substances or conditions qualifying under Section C having a level exceeding the maximum amount allowed, or when the edible portion of a crop is exposed to flood waters, a claim will not be adjusted for quality deficiencies. If the claimant elects to adjust for quality deficiencies, the claimant must elect to adjust for quality deficiencies on the date of final adjustment for the unit, the following will apply (if such production is Zero Market Value, see Section D):
  - a. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
    - ii. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
  - b. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
    - ii. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
  - c. If production qualifying under Section C3 remains unsold, or is not destroyed more than 365 days after the calendar date for the end of insurance period, the claimant will not be adjusted for any quality deficiencies listed in Section C.
  - d. If production qualifying under Section C3 remains unsold, or is not destroyed more than 365 days after the calendar date for the end of insurance period, the claimant will not be adjusted for any quality deficiencies listed in Section C.

### ZERO MARKET VALUE PRODUCTION

For production listed in sections A, B, or C that we determine has zero market value due to insured quality deficiencies:

1. For production in Section A, the pre-established DFs.
2. For production in Section B, the pre-established DFs.

## Special Provisions 2026 and Succeeding Crop Years

Ùcæ^kMÎæ@ÁFÎD

County: Minidoka (067)

[illegible]

|       |  |
|-------|--|
| *     | %Local Market Price-As defined in the applicable Basic, Crop, or these Provisions.   |
| **    | %Disinterested third party-As a third party who is not a buyer or seller of the crop. A person or business who does not routinely purchase production for resale or for feed will not be considered a disinterested third party if the RIVs applied by the buyer are not reflective of the RIVs in the local market.   |
| ***   | %Zero market value-Occurs when no buyers in your local area are willing to purchase the production and fair consideration to deliver production to a market outside your local marketing area (distant market) is equal to or greater than the production's value at the distant market or when acreage of an insured crop in which the edible portion of the crop has been exposed to flood waters. |
| ****  | %Sold-Grain is considered sold on the date that final settlement between the buyer and seller has occurred and title of the grain has passed from the seller to the buyer  |
| ***** | %Unsold-Grain that does not meet the definition of %sold.  |
