General

AVRB represents the Alfalfa Variety Review Board or its successor entities responsible for determining fall dormancy ratings of Alfalfa cultivars. DRA is defined as the Dormancy Rating Group A (ratings 1-4) and when applicable, DRD is defined as Dormancy Rating Group D (ratings 5-9).

Alfalfa seed grown under a forage seed contract may have optional units established by variety in lieu of the optional unit provisions in section 34(c) of the Basic Provisions. If optional units by variety are selected, all acres of a variety will be considered to be one optional unit, even if more than one forage seed contract is involved for the variety. If optional units by variety are not selected, the optional unit provisions in section 34(c) of the Basic Provisions apply. The type of optional units selected applies to all contracted acres insured under the policy. The optional unit provisions in section 34(c) of the Basic Provisions apply to alfalfa seed grown solely for harvest as certified seed and not grown under a forage seed contract.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.
