General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

In lieu of section 7 of the Small Grains Crop Provisions, the end of insurance period for winter-type acreage will be August 31 immediately following planting.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Quality

GENERAL STATEMENTS:

For the purpose of this policy, the term "net production to count" means the production of the crop after deducting the production of the cover crop and the production of the other crops that are not insured under this policy.

The net production to count is determined by the following factors: (1) the production of the crop as determined by the official yield report; (2) the production of the cover crop as determined by the official yield report; (3) the production of the other crops that are not insured under this policy as determined by the official yield report; and (4) the production of the crop as determined by the official yield report, adjusted for the production of the cover crop and the production of the other crops that are not insured under this policy.

The net production to count is determined by the following factors: (1) the production of the crop as determined by the official yield report; (2) the production of the cover crop as determined by the official yield report; (3) the production of the other crops that are not insured under this policy as determined by the official yield report; and (4) the production of the crop as determined by the official yield report, adjusted for the production of the cover crop and the production of the other crops that are not insured under this policy.

Qualifying for quality adjustment, that does not contain substances or conditions that are injurious to human or animal health, shall be adjusted under the following factors: (1) the production of the crop as determined by the official yield report; (2) the production of the cover crop as determined by the official yield report; (3) the production of the other crops that are not insured under this policy as determined by the official yield report; and (4) the production of the crop as determined by the official yield report, adjusted for the production of the cover crop and the production of the other crops that are not insured under this policy.

The AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

Any production qualifying under section B or C (except for section C3) that is sold**** to other than a disinterested third party**, or that is not sold 60 days after the calendar date for the end of the insurance period, shall be adjusted under the following factors: (1) the production of the crop as determined by the official yield report; (2) the production of the cover crop as determined by the official yield report; (3) the production of the other crops that are not insured under this policy as determined by the official yield report; and (4) the production of the crop as determined by the official yield report, adjusted for the production of the cover crop and the production of the other crops that are not insured under this policy.

Production qualifying under Sections B or C (except for production qualifying under section C3) that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

For production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following factors: (1) the production of the crop as determined by the official yield report; (2) the production of the cover crop as determined by the official yield report; (3) the production of the other crops that are not insured under this policy as determined by the official yield report; and (4) the production of the crop as determined by the official yield report, adjusted for the production of the cover crop and the production of the other crops that are not insured under this policy.
