General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

In accordance with the definition of "production reporting date" in the Basic Provisions, if you submit an application for insurance after the winter sales closing date or land is added after the production reporting date on which the spring type will be planted, the production reporting date will be the earlier of the acreage reporting date or 45 days after the spring sales closing date.

Date

In lieu of section 5 (Cancellation and Termination Dates) of the Small Grains Crop Provisions, the Cancellation Date will be September 30 and the Termination Date will be November 30.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Any acreage planted to a hay/forage variety (including but not limited to Willow Creek) is not insurable, unless grown for harvest or sale as seed. A written agreement will be required to insure any hay/forage variety grown for harvest or sale as seed.

Quality

GENERAL STATEMENTS:

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Wheat (0011)	Unit: 100 bushels
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Brookings (011)

For the purpose of this contract, the following definitions shall apply:

Production to Count: The production of wheat for which a claim is made shall be determined by the following factors: (1) the yield of wheat as determined by the official yield test; (2) the percentage of wheat that is sold or offered for sale within the specified time period; (3) the percentage of wheat that is stored in a facility that is approved by the insurance company; and (4) the percentage of wheat that is stored in a facility that is approved by the insurance company.

Net Production: The net production of wheat shall be determined by subtracting the production of wheat that is sold or offered for sale within the specified time period from the total production of wheat.

Quality Adjustment: The quality adjustment shall be determined by the following factors: (1) the percentage of wheat that is sold or offered for sale within the specified time period; (2) the percentage of wheat that is stored in a facility that is approved by the insurance company; and (3) the percentage of wheat that is stored in a facility that is approved by the insurance company.

Harvest Extension: The AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

Production Qualifying: Any production qualifying under section B or C (except for section C3) that is sold**** to other than a disinterested third party**, or that is not sold 60 days after the end of the insurance period, shall be considered as production qualifying for quality adjustment.

Production Qualifying: Production qualifying under Sections B or C (except for production qualifying under section C3) that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following:

- For production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health, the DF will be determined by adding the applicable DFs from Section B to the applicable DFs from Sections C1 or C2.
- Sections C1 or C2 and Section B below, the DF will be determined by adding the applicable DFs from Section B to the applicable DFs from Sections C1 or C2.
- For production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health, the DF will be determined by adding the applicable DFs from Section B to the applicable DFs from Sections C1 or C2.

A

1. OPTION TO DELAY CLAIM SETTLEMENT

- On the date of final inspection for the unit, if any of your unsold***** production qualifies for quality adjustment under sections B and/or C1 or C2a ii and C2a iv below, your claim will be settled using the applicable DF's for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days

after the calendar date for the EOIP.

- b. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP.
- c. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP.
- d. For any production sold**** to other than a disinterested third party**, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.
- e. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP.
- f. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP.
- g. If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP.

4

2. SECTION 14(e) OF THE BASIC PROVISIONS

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B, and C must be obtained in accordance with the Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period (EOIP).

3. EXTENSION OF TIME TO HARVEST

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B, and C must be obtained in accordance with the Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period (EOIP).

If we determine you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP.

If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP.

If you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA taken after the calendar date for the EOIP will be used to determine insurable quality deficiencies. If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies will be taken after the calendar date for the EOIP.

If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable

If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable

disinterested third party; or

- ii. If the insured is not a producer of the commodity, the insured shall not be eligible for a claim under this policy.
- b. If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.
- i. If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.
- ii. If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.
- c. If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.
- d. If production qualifying under Section C3 remains unsold, or is not destroyed, more than 365 days after the calendar date for the end of the insurance period, such production will not be adjusted for any quality deficiencies listed in Section C.

SECTION D - ZERO MARKET VALUE PRODUCTION

If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.

1. If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.
2. If you do not destroy (or refuse to destroy) production in a manner acceptable to us, such production to count is no longer considered to be zero market value and will be adjusted as follows:
 - a. If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.
 - b. If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.
 - c. For production in Section C1 or C2, such production will not be adjusted for any quality deficiencies listed in Section C.
3. If the insured is a producer of the commodity, the insured shall be eligible for a claim under this policy if the insured is a producer of the commodity in the county of the insured's residence at the time of the loss.
