General

Optional unit division is NOT available by section or section equivalent. Optional unit division is available based on Farm Serial Number (FSN) and any other method specified in the Basic Provisions or Crop Provisions except section or section equivalent. To be eligible for the available methods of optional unit division, you must meet all applicable requirements.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Wheat (0011)	Use Year: 2026
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Chickasaw (017)

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Quality

GENERAL STATEMENTS:

For the purpose of this section, the term "quality" means the quality of the crop as determined by the quality adjustment factors.

For the purpose of this section, the term "quality adjustment factors" means the factors that are used to determine the quality of the crop. The factors are listed in the table below. The factors are used to determine the quality of the crop by multiplying the factors together and then dividing the result by the sum of the factors.

For the purpose of this section, the term "quality adjustment" means the adjustment that is made to the quality of the crop based on the quality adjustment factors. The adjustment is made by multiplying the quality of the crop by the quality adjustment factor.

For the purpose of this section, the term "qualifying for quality adjustment" means the crop must meet the requirements of the quality adjustment factors. The crop must be a crop that is insured under the plan and must be a crop that is not a crop that is not insured under the plan.

For the purpose of this section, the term "extension of time to harvest" means the extension of time to harvest that is granted to the insured under the plan. The extension of time to harvest is granted to the insured under the plan if the insured is unable to harvest the crop by the end of the insurance period.

For the purpose of this section, the term "production qualifying under section B or C" means the production that is sold to other than a disinterested third party, or that is not sold 60 days after the end of the insurance period.

For the purpose of this section, the term "production qualifying under Sections B or C" means the production that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

For the purpose of this section, the term "production qualifying for quality adjustment" means the production that contains substances or conditions that are injurious to human or animal health will be determined in the table below.

DFs for Aflatoxin:

Aflatoxin Range	DF
0.0 - 300.1 ppb	See Quality Adjustment Tab for Discount Factors
300.1 ppb & above	See C3 below

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any other substances or conditions qualifying under Section C having a level exceeding the maximum amount allowed or when the edible portion of a crop is exposed to flood waters, a claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed.
- a. If the level of Aflatoxin is less than 300 ppb, the level of Vomitoxin is less than 10 ppm, and the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.

 - i. If the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
 - ii. If the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
 - b. If the level of Aflatoxin is 300 ppb or more, the level of Vomitoxin is 10 ppm or more, and the production is sold, fed, utilized in any other manner, or destroyed, the claim will be:

 - i. If the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
 - ii. If the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
 - c. If the level of Aflatoxin is 300 ppb or more, the level of Vomitoxin is 10 ppm or more, and the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
 - d. If production qualifying under Section C3 remains unsold, or is not destroyed, more than 365 days after the calendar date for the end of the insurance period, such production will not be adjusted for any quality deficiencies listed in Section C.

SECTION D - ZERO MARKET VALUE PRODUCTION

If the level of Aflatoxin is 300 ppb or more, the level of Vomitoxin is 10 ppm or more, and the production is sold, fed, utilized in any other manner, or destroyed, the claim will be:

1. If the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
