#### General

Optional unit division is NOT available by section or section equivalent. Optional unit division is available based on Farm Serial Number (FSN) and any other method specified in the Basic Provisions or Crop Provisions except section or section equivalent. To be eligible for the available methods of optional unit division, you must meet all applicable requirements.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

#### Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

### Premium

Any acreage designated as unrated on the actuarial map will be insurable only by written agreement. Contact your crop insurance agent by the sales closing date to determine eligibility requirements.

### Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

### Quality

#### GENERAL STATEMENTS:

For the purpose of this section, the term "qualifying production" means the production of a crop that is eligible for insurance under the plan and that is not excluded from coverage under the plan.

For the purpose of this section, the term "quality adjustment" means the adjustment to the production of a crop that is based on the quality of the production. The quality adjustment is determined by comparing the actual production to the expected production, and the difference is the quality adjustment. The quality adjustment is applied to the production to determine the net production to count.

For the purpose of this section, the term "net production to count" means the production of a crop that is eligible for insurance under the plan and that is not excluded from coverage under the plan, after the quality adjustment is applied. The net production to count is determined by subtracting the quality adjustment from the actual production.

For the purpose of this section, the term "qualifying for quality adjustment" means the production of a crop that is eligible for insurance under the plan and that is not excluded from coverage under the plan, and that is not excluded from coverage under the plan.

For the purpose of this section, the term "extension of time to harvest" means the extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under Sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For the purpose of this section, the term "production qualifying under section B or C (except for section C3)" means the production of a crop that is eligible for insurance under the plan and that is not excluded from coverage under the plan, and that is not excluded from coverage under the plan.

For the purpose of this section, the term "production qualifying under Sections B or C (except for production qualifying under section C3)" means the production of a crop that is eligible for insurance under the plan and that is not excluded from coverage under the plan, and that is not excluded from coverage under the plan.
