### General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Refer to the Margins and Yields tab of these actuarial documents for the data source used for area yields.

### Practice

\*3 Non-Conventional: Planted in a two step operation in which the seed is first broadcast by any method onto the surface of a seedbed which has been properly prepared for the planting method and production practice and is subsequently incorporated into the soil at the proper depth in a timely manner.

\*4 FAC (Following Another Crop): A planted crop following:

1. A perennial hay crop that was harvested in the same calendar year; or
2. A crop (other than a cover crop) that has reached the headed or budded stage prior to termination, regardless of the percentage of plants that reached the headed or budded stage;

Termination means growth has ended. A crop that follows a cover crop that meets the criteria outlined in the Insurance Availability section of the Special Provisions is considered NFAC.
