General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

In accordance with the definition of "production reporting date" in the Basic Provisions, if you submit an application for insurance after the winter sales closing date or land is added after the production reporting date on which the spring type will be planted, the production reporting date will be the earlier of the acreage reporting date or 45 days after the spring sales closing date.

Date

In lieu of section 7 of the Small Grains Crop Provisions, the end of insurance period for winter-type acreage will be August 31 immediately following planting.

*5 In lieu of the definition of late planting period in section 1 of the Basic Provisions, for type winter only, please refer to the End Of Late Planting Period Date.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Barley (0091)	Use: 0000
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Indiana (063)

adjustment factors are considered in determining production to count.

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

[illegible]

B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period

[illegible]

Automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in

- [illegible]

1. OPTION TO DELAY CLAIM SETTLEMENT:

- a. If you do not elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP, your claim will be settled using the applicable DFCs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.
- b. If you sell the production to a disinterested third party during this delay, your claim will be settled using the Reduction In Value (RIV) as outlined below, unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.
- c. If you do not elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP, your claim will be settled using the applicable DFCs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Barley (0091)	U.S. Marketing Year: 2025/26
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Indiana (063)

When the crop is sold to other than a disinterested third party, fed, utilized in any other manner, or when a pre-established DF is applicable.

6. ZERO MARKET VALUE

If on the date of final inspection for the unit, any production which due to insurable causes is determined to have zero market value***, such production will not be eligible for a claim, except for production fed or used in any other manner.

7. REDUCTION IN VALUE (RIV):

The RIV is the difference between the local market price and the price received for the production.

- a. Moisture content;
- b. Damage due to uninsured causes;
- c. Drying;
- d. Handling;
- e. Processing; or
- f. The RIV is calculated as follows:
 - i. $RIV = (LMP - P) \times (1 - D) \times (1 - H) \times (1 - P) \times (1 - S)$
 - ii. If a lower RIV is available for production sold at a distant market, the RIV at the distant market may be increased by the fair consideration to deliver the production to the distant market, provided the resulting RIV does not exceed the RIV in your local marketing area.
 - iii. The RIV may be increased by the fair consideration to deliver the production to the distant market, provided the resulting RIV does not exceed the RIV in your local marketing area.
 - iv. The RIV and local market price* are determined on the date such quality adjusted production is sold to a disinterested third party.

SECTION A - DISCOUNT FACTOR CHARTS

The discount factor is the percentage of the local market price that the production is sold for. The discount factor is determined by the quality of the production and the marketing year.

GRADE DISCOUNT:

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Barley (0091)	Use 1000 lbs. for 100 bushels
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Indiana (063)

Barley will be discounted for grade as specified within the Quality Adjustment Tab located in the AD.

TEST WEIGHT DISCOUNT:

Discounts for low test weight are as follows (U.S. No. 5 for Test Weight . 48 lbs. to 36.0 lbs.; U.S. Sample Grade . 48 lbs. and below):

Test Weight Pounds	DF
36 and above	None
35.99-30	See Quality Adjustment Tab for Discount Factors
Below 30	See section B

DAMAGE DISCOUNT:

Discounts for low test weight are as follows (U.S. No. 5 for Test Weight . 48 lbs. to 36.0 lbs.; U.S. Sample Grade . 48 lbs. and below):

Damage %	DF
10 and below	None
10.01-34	See Quality Adjustment Tab for Discount Factors
Above 34	See Section B

THIN BARLEY:

Discounts for low test weight are as follows (U.S. No. 5 for Test Weight . 48 lbs. to 36.0 lbs.; U.S. Sample Grade . 48 lbs. and below):

Thin Barley %	DF
75.00 and below	None
75.01-100	See Quality Adjustment Tab for Discount Factors

SPECIAL GRADE DISCOUNTS:

Discounts for low test weight are as follows (U.S. No. 5 for Test Weight . 48 lbs. to 36.0 lbs.; U.S. Sample Grade . 48 lbs. and below):

Black Barley, Ergoty, Blighted, or Smutty	See section B
