General

Optional unit division is NOT available by section or section equivalent. Optional unit division is available based on Farm Serial Number (FSN) and any other method specified in the Basic Provisions or Crop Provisions except section or section equivalent. To be eligible for the available methods of optional unit division, you must meet all applicable requirements.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Quality

GENERAL STATEMENTS:

For the purpose of this section, the term "quality" means the quality of the crop as determined by the quality adjustment factors.

For the purpose of this section, the term "quality adjustment factors" means the factors that are used to determine the quality of the crop. The factors are listed in the table below. The factors are used to determine the quality of the crop by multiplying the factors together. The result is the quality of the crop.

For the purpose of this section, the term "quality adjustment" means the adjustment to the quality of the crop that is made based on the quality adjustment factors. The adjustment is made by multiplying the quality of the crop by the quality adjustment factor.

For the purpose of this section, the term "qualifying for quality adjustment" means the crop must meet the requirements of the quality adjustment factors. The crop must be of a certain quality and must be of a certain quantity.

For the purpose of this section, the term "extension of time to harvest" means the extension of time to harvest that is granted to the producer. The extension is granted for a certain period of time and is based on the quality of the crop.

For the purpose of this section, the term "production qualifying under section B or C" means the production that is sold to other than a disinterested third party, or that is not sold 60 days after the date of harvest.

For the purpose of this section, the term "production qualifying under Sections B or C" means the production that is sold to other than a disinterested third party, or that is not sold 60 days after the date of harvest. The production must be of a certain quality and must be of a certain quantity.

For the purpose of this section, the term "production qualifying for quality adjustment" means the production that is sold to other than a disinterested third party, or that is not sold 60 days after the date of harvest.
