General

Optional unit division is NOT available by section or section equivalent. Optional unit division is available based on Farm Serial Number (FSN) and any other method specified in the Basic Provisions or Crop Provisions except section or section equivalent. To be eligible for the available methods of optional unit division, you must meet all applicable requirements.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

Quality

GENERAL STATEMENTS:

For the purpose of this section, the term "quality" means the quality of the crop as determined by the quality adjustment factors.

For the purpose of this section, the term "quality adjustment factors" means the factors that are used to determine the quality of the crop. The factors are listed in the following table:

Factor	Description
1	Quality adjustment factors are considered in determining production to count.

For the purpose of this section, the term "quality adjustment" means the adjustment made to the production to count based on the quality of the crop. The adjustment is made based on the quality adjustment factors.

For the purpose of this section, the term "quality adjustment statement" means the statement that is used to determine the quality of the crop. The statement is used to determine the quality of the crop based on the quality adjustment factors.

(EOIP).

We determine you are prevented from harvesting by the calendar date for the EOIP due to an insurable cause of damage that occurred during the insurance period and we allow an extension of time to harvest, the time to determine insurable quality deficiencies will also be extended to 60 days after the EOIP. All samples for QA and RIV must be submitted to the insurance company within 60 days after the calendar date for the EOIP. If you submit a sample for QA and RIV after 60 days after the calendar date for the EOIP, you will not be allowed to claim for indemnity not later than the earlier of 60 days after harvest, or 60 days after the date we determine the crop could have been harvested and you did not harvest your crop until AFTER 60 days after the calendar date for the EOIP, and your production qualifies for quality adjustment under sections B1, C1a or C2a i, you will be allowed 30 days after harvest to market your grain and receive an RIV unless the production qualifies solely under Section A, in which case, only the DF(s) in Section A will be used to determine the RIV. If you submit a sample for QA and RIV after 60 days after the calendar date for the EOIP, you will not be allowed to claim for indemnity not later than the earlier of 60 days after harvest, or 60 days after the date we determine the crop could have been harvested and you did not harvest your crop until AFTER 60 days after the calendar date for the EOIP, and your production qualifies for quality adjustment under sections B1, C1a or C2a i, you will be allowed 30 days after harvest to market your grain and receive an RIV unless the production qualifies solely under Section A, in which case, only the DF(s) in Section A will be used to determine the RIV.

10.1 ppm & above	See C3 below

2. If the level of a substance or condition is less than the maximum allowable, adjust the production in the following manner.
 - a. If the level of a substance or condition is less than the maximum allowable, the DF will be:
 - i. If the level of a substance or condition is less than the maximum allowable, the DF will be the sum of all insurable quality deficiencies, and that value divided by the local market price.
 - ii. If the level of a substance or condition is less than the maximum allowable, the DF will be the sum of the applicable DFs included in sections A or B2 (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B2.
 - iii. If the level of a substance or condition is less than the maximum allowable, the DF will be the sum of the applicable DFs included in sections A or B2 (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B2.
 - iv. For unsold production containing all other mycotoxins or substances or conditions prior to 60 days after the calendar date for the EOIP (unless you elect to delay settlement as specified in the General Statements above), the DFs will be .500, added to the applicable DFs included in sections A, or B2 above.
 - v. For unsold production containing all other mycotoxins or substances or conditions 60 days after the calendar date for the EOIP, the DFs will be .500, added to the applicable DFs included in sections A or B2 above.
 - b. If the level of a substance or condition is less than the maximum allowable, the DF will be:
