General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

For insured crop acreage planted during the late planting period, the production guarantee for each acre will be reduced for each day planted after the final planting date by: 3% for the 1st through the 5th day.

Special Provisions 2026 and Succeeding Crop Years

$$\mathbb{U} \subset \mathbb{R}^n \times \mathbb{R}^m \setminus \{0\} \quad \{0\} \in \mathbb{D}$$

County: Caddo (015)

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Any fall planted acreage on which seed is spread onto the soil surface by any method (e.g. airplane or otherwise broadcast seeded) and is subsequently mechanically incorporated into the soil, will be insurable only if you request an inspection for this acreage within 72 hours after the final planting date or within 72 hours after you complete incorporating the seed if you plant in the late planting period, and we agree in writing that the acreage has an adequate stand to produce the yield used to determine your production guarantee. No coverage will be provided if an adequate stand is not established within 30 days after the end of the late planting period or within 30 days after the final planting date if no late planting period is applicable. Insurance will attach to acreage with an adequate stand on the date the acreage is inspected.

- Cultivars of *Brassica carinata* are eligible for insurance under the Canola and Rapeseed Crop Provisions and are not insurable under the Mustard Crop Provisions; however, *Brassica carinata* is only insurable by written agreement.

The sum of all DFs for production containing substances or conditions that are injurious to human or animal health is allowed, in addition to applicable DFs from sections A or B above, except as shown in C3 below.

Any potential loss due to substances or conditions identified by the Food and Drug Administration, other public health organizations of the United States, or a public health agency of the applicable State in which the insured crop is grown, at a level determined as injurious to human or animal health, will be covered only if the appropriate samples of the production were obtained by our adjuster (or a trained disinterested third party approved by us) (except for flood-damaged grain), and the

DFs for Aflatoxin:

Aflatoxin Range	DF
0.1 - 300.1 ppb	See Quality Adjustment Tab for Discount Factors
300.1 ppb & above	See C3 below

Á

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any other substances or conditions qualifying under Section C having a level exceeding the maximum amount allowed, or when the edible portion of a crop is exposed to flood waters, a claim will not be $\frac{\text{C2b (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B2 above.}}{\text{C2b (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B2 above.}}$

Special Provisions 2026 and Succeeding Crop Years

Year: 2026

Commodity: Canola (0015)

Unit: 1000 bushels

Date: 6/17/2025

Plan: Yield Protection (01)

County: Caddo (015)

Revenue Protection (02)

Revenue Prot with Harvest Price Exclusion (03)

On the date of final adjustment for the unit, the following will apply (if such production is Zero Market Value, see Section D):

- a. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$
 - i. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
 - ii. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$
- b. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$ will be:
 - i. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
 - ii. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$
- c. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$
 - i. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
 - ii. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$
- d. If production qualifying under Section C3 remains unsold, or is not destroyed more than 365 days after the calendar date for the end of insurance period, $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$

ZERO MARKET VALUE PRODUCTION

For production listed in sections A, B, or C that we determine has zero market value due to insured quality deficiencies:

1. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$
2. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$ and will be adjusted as follows:
 - a. For production in Section A . The pre-established DFs.
 - b. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$
 - c. For production in Section C1 or C2, such production will not be adjusted for any quality deficiencies listed in Section C.
3. $\frac{RIV}{\text{Local Market Price}} \times \text{Quality Deficiency} \times \text{Production}$
