General

Acreage of coffee trees considered dead due to an infestation of nematodes diagnosed by the University of Hawaii or the State of Hawaii Department of Agriculture must be fallowed for one year following the chipping and mulching or removal of the infected trees and the application of a recommended soil treatment to the affected acreage.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

The trailing islands in the state of Hawaii, defined to be above Latitude 22 degree North, shall not constitute a triggered county or county adjacent to a triggered county for purposes of determining a county loss trigger under the Hurricane Insurance Protection-Wind Index Endorsement.

Price

Use 55% of the tree reference price for the appropriate stage, round up to the next cent when calculating the amount of protection per unit and the unit value for catastrophic coverage (CAT) policies.
