General

In accordance with section 3(d) of the Guaranteed Production Plan of the Fresh Market Tomato Crop Insurance Provisions, the production guarantees for cherry, grape, roma, and plum type tomatoes will be the same as specified in section 3(b)(2).

In accordance with the definition of potential production in section 1 and section 13(c)(1)(iii)(B) and (c)(2)(ii)(B) of the Guaranteed Production Plan of the Fresh Market Tomato Crop Provisions, the classification size for the following tomatoes is as follows:

1. Cherry type- a minimum of 3/4 inch in diameter,
2. Grape type- a minimum of 1/2 inch in diameter,
3. Roma and plum types- a minimum of 1 and 1/2 inches in diameter and 2 inches in length.

Mulch is defined under this practice as a plastic film that is placed on the beds prior to planting the tomato crop and remains until after harvest is complete.

In accordance with section 12(b)(1) and 12(b)(2) of the Guaranteed Production Plan of the Fresh Market Tomato Crop Insurance Provisions, the maximum amount of the replanting payment per acre will be the lesser of the actual cost of replanting; or

1. The amounts shown in the Prevented Planting and Replanting Payment tab;
2. Multiplied by your price election; and
3. Multiplied by your insured share.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In addition to section 8 (Insured Crop) of the Crop Provisions, all tomato types listed in these special provisions must be field grown.

Type

*5 Traditional Round/Globe Definition: Field Grown mature green or ripe fresh market tomato types that would meet the standards of a U.S. No. 1 as provided in the United States Standards for Grades of Fresh Market Tomatoes.

*6 Roma varieties will be insurable under the plum type.

Date

In lieu of the cancellation and termination dates in the crop provisions, the cancellation and termination dates are January 31.

In accordance with section 10 of the Crop Provisions, the end of insurance date will be no later than the date specified in the actuarial documents.

Price

Contract price:

You may use a contract price to determine your insurance guarantee when a contract price code of ñyesò exists on the Prices tab in the actuarial documents for the

crop, type, and practice.

Contract price authority (i.e., rules governing the use of contract prices and the method to determine a contract price) will be found in one of the following three places, listed in priority order:

1. Special Provisions, separate from this statement, which authorizes the use of the Contract Price Addendum (CPA);

2. Crop Provisions; or

3. CPA.

When the contract price code is ñyesò on the Prices tab for the crop, type, and practice:

1. If the Crop Provisions or Special Provisions provide the contract price authority, your price will be determined in accordance with the Crop Provisions or Special Provisions. If neither the Crop Provisions or Special Provisions provide contract price authority, your price will be determined in accordance with the CPA; and

2. The Crop Provisions or Special Provisions may only provide contract price authority for specific types or practices. When this occurs, the CPA may be used to determine a contract price for other types or practices where contract price authority is not provided through the Crop Provisions or these Special Provisions.

Insurance Availability

In lieu of section 8(e)(4) of the Guaranteed Production Plan of Fresh Market Tomato Crop Provisions, and in accordance with section 8(e) of these crop provisions, CHERRY, GRAPE, ROMA, AND PLUM type tomatoes will be insurable in this county.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at https://www.rma.usda.gov/en/Topics/Cover-Crops.
