| T/P 3 | No Type Specified 997 | No Practice Specified (OT) 724 |

**General**

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

**Price**

Contract price:

You may use a contract price to determine your insurance guarantee when a contract price code of ñyesòexists on the Prices tab in the actuarial documents for the crop, type, and practice.

Contract price authority (i.e., rules governing the use of contract prices and the method to determine a contract price) will be found in one of the following three places, listed in priority order:

1. Special Provisions, separate from this statement, which authorizes the use of the Contract Price Addendum (CPA);
2. Crop Provisions; or
3. CPA.

When the contract price code is ñyesòon the Prices tab for the crop, type, and practice:

1. If the Crop Provisions or Special Provisions provide the contract price authority, your price will be determined in accordance with the Crop Provisions or Special Provisions. If neither the Crop Provisions or Special Provisions provide contract price authority, your price will be determined in accordance with the CPA; and

2. The Crop Provisions or Special Provisions may only provide contract price authority for specific types or practices. When this occurs, the CPA may be used to determine a contract price for other types or practices where contract price authority is not provided through the Crop Provisions or these Special Provisions.

**Insurance Availability**

If the acreage has been infested with nematodes as named in the applicable crop provisions and the infestation has been verified by the University of Hawaii through tests conducted by them, the infected trees must be removed from the field, the appropriate soil treatment applied, and the affected acreage fallowed for one year from the date the soil treatment was completed before insurance will attach, unless nematode resistant transplants were used.
