General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Type

*2 GMO varieties include: Rainbow and SunUp or any cross of either of the two with another Non-GMO variety.

Price

Contract price:

You may use a contract price to determine your insurance guarantee when a contract price code of ñyesò exists on the Prices tab in the actuarial documents for the crop, type, and practice.

Contract price authority (i.e., rules governing the use of contract prices and the method to determine a contract price) will be found in one of the following three places, listed in priority order:

1. Special Provisions, separate from this statement, which authorizes the use of the Contract Price Addendum (CPA);

2. Crop Provisions; or

3. CPA.

When the contract price code is ñyesò on the Prices tab for the crop, type, and practice:

1. If the Crop Provisions or Special Provisions provide the contract price authority, your price will be determined in accordance with the Crop Provisions or Special Provisions. If neither the Crop Provisions or Special Provisions provide contract price authority, your price will be determined in accordance with the CPA; and

2. The Crop Provisions or Special Provisions may only provide contract price authority for specific types or practices. When this occurs, the CPA may be used to determine a contract price for other types or practices where contract price authority is not provided through the Crop Provisions or these Special Provisions.

Insurance Availability

In accordance with section 7(d)(2)(i) of the applicable Hawaii Tropical Fruit crop provisions, papaya acreage that has reached a minimum of nine (9) months old on May 31 preceding the crop year is insurable. This excludes the Kapoho variety.
