### 2021 and Succeeding Crop Years

Year: 2021	Commodity: Dry Peas (0067)	State: Washington (53)
Date: 6/29/2020	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Adams (001)

TP	Type	Practice
T/P 11	Fall Smooth Green Or Yellow 197 *3 *4 *14	Organic(Transitional) Non-Irr. 714 *4

#### Statement

##### General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop.

##### Type

- \*3 Includes all spring-planted smooth green and yellow varieties of commercial dry edible peas, and other classes of dry peas grown to produce seed to be planted at a future date under a processor/seed company contract which meets all requirements of such a contract as defined in the crop provisions except the third (pricing) requirement.

##### Date

- \*4 If you have selected the winter coverage option (WCO) for the fall planted types, the following dates applicable to your policy are specified in the ~~Options~~ <sup>Options</sup> section within the ~~Dates~~ <sup>Tab</sup> of the Actuarial Information Browser:
- 1) The sales closing date [applicable for both fall and spring planted types];
  - 2) The final planting date for acreage covered under the WCO and the WCO will not be applicable to acreage planted after this date; and
  - 3) The acreage reporting date for acreage of the fall planted types covered by this option.

##### Price

- \*5 The Base (contracted) Price will not include added value attributable to hauling expenses beyond the local marketing area or post production operations such as processing (cleaning/drying), sorting, packaging, etc.

In lieu of the provisions in section 3(e)(1) of the Basic Provisions that govern additional price amounts, we may provide an additional projected price for those types where the Dry Pea Revenue Endorsement does not offer coverage for price movement. For spring types, the additional projected prices will be announced concurrently with the projected prices for those types where the Dry Pea Revenue Endorsement offers coverage for price movement, or in the case of fall types no later than 15 days prior to the sales closing date. The additional projected prices will not be less than the initial projected prices that are made available by the contract change date. Any claim settlement and amount of premium will be based on the additional projected prices.

If a contract price is available as shown in the actuarial documents, you may elect to have your projected price and/or harvest price determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your projected price and/or harvest price will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

## Special Provisions of Insurance

### 2021 and Succeeding Crop Years

Year: 2021	Commodity: Dry Peas (0067)	State: Washington (53)
Date: 6/29/2020	Plan: Yield Protection (01)	County: Adams (001)
	Revenue Protection (02)	
	Revenue Prot with Harvest Price Exclusion (03)	

- \*8 In lieu of the provisions in section 4(b) of the Basic Provisions that require changes in price elections to be available by the contract change date, the projected prices for spring types will be announced after the fall sales closing date but no later than November 30th of the calendar year preceding the crop year except for those types where the Dry Pea Revenue Endorsement offers coverage for price movement; these types are announced not later than the third business day of March.

#### Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

## Special Provisions of Insurance 2021 and Succeeding Crop Years

Year: 2021	Commodity: Dry Peas (0067)	State: Washington (53)
Date: 6/29/2020	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Adams (001)

In accordance with section 9(a)(1)(iv) in the Common Crop Insurance Policy Basic Provisions (Basic Provisions), acreage that has not been planted and harvested or insured (including insured acreage that was prevented from being planted) in at least one of the three previous crop years or acreage where the only crop that has been planted and harvested in one of the three previous crop years was a cover, hay, or forage crop (hereinafter referred to as new breaking acreage) is insurable at 80 percent of the applicable published county T-Yield in the actuarial documents without a written agreement if all of the following requirements 1 through 4 below are met. New breaking acreage is insurable at 65 percent of the applicable published county T-Yield in the actuarial documents without a written agreement if only requirements 1, 2, and 4 below are met.

1. The policyholder must provide documentation that 75 percent or more of the new breaking acreage by field (or within an existing field if only a portion of the field is new breaking acreage) is composed of soil types defined as Capability Class I, II, III, or IV as determined by the Natural Resources Conservation Service (NRCS) Web Soil Survey (<http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm>);
2. The policyholder must certify that the new breaking acreage was broken out or chemically destroyed on or before November 30 prior to planting;
3. The policyholder must provide documentation that the new breaking acreage has been previously broken and planted to a crop. Examples of documentation include but are not limited to: a FSA-578 document showing the prior crop that the new breaking acreage was planted to, a prior crop year's FSA-578 document showing that the new breaking acreage is classified as cropland, receipts/invoices from custom planters or custom harvesters detailing the fields that were planted or harvested, etc.; and
4. If NRCS requires a Conservation Plan on the new breaking acreage, the policyholder must provide documentation that one is, or will be, in place. If NRCS does not require a Conservation Plan on the new breaking acreage, the producer must certify that one is not required.

Up to and including 320 acres of new breaking acreage per county (on a whole field basis), that meet the requirements above, may be insurable under this Special Provisions statement for the policyholder/entity per each sales closing date (for example, a total of 320 acres or less of new breaking acreage for crops with a September 30 sales closing date and total of 320 acres or less of new breaking acreage for crops with a March 15 sales closing date). Any new breaking acreage (on a whole field basis) that meets the requirements above and exceeds the 320-acre limitation will require a written agreement to establish insurability (only the acreage that exceeds 320 acres requires a written agreement, up to 320 acres may be approved under this Special Provisions statement even if the producer has more than 320 new breaking acres in the county).

### Underwriting Standards:

The producer must provide the applicable documentation and certification described in requirements 1 through 4 above to the Approved Insurance Provider (AIP) on or before the acreage reporting date for insurability of such new breaking acreage. If the above requirements are met and the described documentation and certification is provided to the AIP by the acreage reporting date, the new breaking acreage will be insurable using the appropriate percentage (65 percent or 80 percent) applied to the applicable published county T-Yield in the actuarial documents (simple average T-Yields, new producer T-Yields, and variable T-Yield percentages do not apply). A separate APH Database must be established for this new breaking acreage the initial crop year it is insured (in subsequent crop years standard APH procedure will apply provided the acreage is insurable under the terms of the Basic Provisions). Additionally, new breaking acreage will not be eligible for prevented planting coverage the initial crop year it is insured under this Special Provisions statement.

In accordance with section 9(a)(1)(iv) in the Common Crop Insurance Policy Basic Provisions (Basic Provisions), acreage that has not been planted and harvested or insured (including insured acreage that was prevented from being planted) in at least one of the three previous crop years or acreage where the only crop that

## Special Provisions of Insurance

### 2021 and Succeeding Crop Years

Year: 2021	Commodity: Dry Peas (0067)	State: Washington (53)
Date: 6/29/2020	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Adams (001)

\*12 Insurance shall not attach or be considered to have attached without a written agreement to a planted non-irrigated crop on acreage from which, in the same calendar year:

- 1) A perennial hay crop was harvested; or
- 2) A crop (other than a cover crop) reached the headed or budded stage prior to termination, regardless of the percentage of plants that reached the headed or budded stage;

Termination means growth has ended. To qualify for a written agreement, you must provide a minimum of the most recent three years of your double cropping actual production history for the crop in the county. A cover crop is one that meets the criteria outlined in the Insurance Availability section of this Special Provisions of Insurance.

#### Yield Protection

In lieu of the definition of price election contained in the Basic Provisions, the price elections will equal the projected prices. For those types where the Dry Pea Revenue Endorsement offers coverage for price movement, the projected prices will be determined under the terms of the Dry Pea Revenue Endorsement and will be announced not later than the third business day of March. If a projected price cannot be determined as described in the Dry Pea Revenue Endorsement, the projected price will be determined by RMA and announced not later than the third business day of March.

#### Quality

\*14 In addition to section 13(d) of the Dry Pea Crop Provisions, for all types of dry peas (except the contract seed pea type), production from insurable acreage is determined by subtracting from gross production Total Dockage, Defects and Foreign Material resulting from insurable cause of loss during the insurance period.
