Statement

General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop.

Type

- *3 Recommended and adapted yellow skinned varieties such as Yukon Gold, will be considered insurable as the white type and will be designated as the white type for the purposes of this policy.

Special Provisions of Insurance

2021 and Succeeding Crop Years

Year: 2021

Commodity: Potatoes (0084)

State: Texas (48)

Date: 8/13/2020

Plan: APH (90)

County: La Salle (283)

Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Insurance will not attach to any acreage on which potatoes were planted the preceding crop year unless authorized by written agreement; however, potatoes will be insurable any two of the first three years on land that has not been previously planted to potatoes. Contact your crop insurance agent for specific information.

To be eligible to insure your acreage under the Organic (Certified) practice you must provide evidence that you have successfully planted the requested organic crop for a minimum of three years. In one of those three years you must have successfully harvested and marketed the crop as organic and the yield you produced must be at least 50% of the current organic T-Yield. If you do not have such documentation, the acreage may only be insured under the Organic (Transitional) practice offered in this county.

Quality

With regard to Grade Inspections and the respective U.S. Grade Standard (i.e. Processing, Chipping, Seed and all other Potatoes), the only size modifications recognized are those instituted by State or Federal Marketing Orders.
